ABSTRACT

ABSTRACT

The **CRM application for TheChaiShop&Co** is designed to help sales representatives manage customer relationships and sales activities efficiently. It allows users to store, access, and update customer and employer details easily.

The system supports **online and offline customer record types** and automatically performs sales calculations such as **order quantity and total bill amount**, improving accuracy and saving time during transactions.

The application also provides **reports and dashboards** for analyzing sales data and includes an **automated birthday email notification feature** to send special offers to customers, improving customer engagement and loyalty.

INTRODUCTION

INTRODUCTION

Customer Relationship Management (CRM) is an important tool used by businesses to manage customer information, improve sales processes, and maintain strong relationships with customers. It helps organizations store and organize customer data efficiently.

The **CRM application for TheChaiShop&Co** is developed to assist sales representatives in managing customer details, distinguishing between online and offline customers, and updating employer information easily through a centralized system.

This application also helps automate sales operations such as calculating order quantity and total bill amount, generating reports and dashboards for sales analysis, and sending automated birthday emails with special offers to customers, thereby improving customer satisfaction and business growth.

PROJECT VIEW:

The project “A CRM Application for TheChaiShop&Co” focuses on developing a Salesforce-based Customer Relationship Management (CRM) system to manage customer, employer, and enterprise accounts efficiently. The system automates sales processes, maintains customer records, generates reports, and improves customer engagement through automated notifications.

PURPOSE:

The purpose of this project is to:

- Streamline customer relationship management
- Automate billing and order calculations
- Improve data accuracy
- Enable data-driven decision-making
- Enhance customer engagement through email automation

REQUIREMENTS ANALYTICS PHASE:

Customer Journey Map:

Sages:

- Login ● Access CRM Application ● Enter Customer Data

● Generate Orders ● Calculate Bills ● View Reports ● Decision Making

DATA FLOW DIAGRAM:

Data Flow:

The data flow of the A CRM APPLICATION FOR THECHAISHOP&CO follows a structured process within the Salesforce platform:

User → Salesforce UI → Custom Objects → Validation Rules → Flows → Reports → Dashboards
→ Dashboards.

Data Flow in CRM Application

ARCHITECTURE DIAGRAM:

PROJECT PLANNING:

- The project followed an Agile-based development approach with defined milestones and sprints.

- A Salesforce Developer account was created to set up the development environment.
- Custom objects were designed to store customer, employer, and enterprise data.
- Custom tabs and a Lightning Application were developed for easy system navigation.
- Fields, relationships, and global picklists were configured to ensure data consistency.
- Page layouts and record types were created based on user roles and customer categories.
- Validation rules were implemented to prevent incorrect data entry.
- Email templates and automated flows were developed for customer notifications.
- Reports and dashboards were created for performance monitoring and analysis.
- Regular sprint reviews and testing were conducted to track progress and resolve issues.
- The project was completed within the planned timeline through systematic scheduling.

PROJECT DEVELOPMENT PHASE:

Project Description:

The CRM Application for TheChaiShop & Co is developed to help sales representatives efficiently manage customer information, employer details, and sales activities. The system automates order quantity and total bill calculations, provides reports and dashboards for sales analysis, and includes an automated birthday email notification feature to enhance customer engagement and loyalty.

MILESTONE 1-SALESFORCE

Sales force:

Salesforce is a cloud-based **Customer Relationship Management (CRM)** platform that enables organizations to manage data, automate processes, and generate insights. It provides tools for application development, automation, reporting, and secure cloud storage.

Activity 1:

Creating a Salesforce Developer Org :

A Developer org has all the features and licenses you need to get started with Salesforce.

1. Search Developer.salesforce.com/signup
2. Enter the following details like First name, last name, Email, Role, Company, Country/Region, Postal code, and Username must be unique.
3. Click sign me up, after a few min you will reserve a mail salesforce org and by using the verify account link you can create your new password.
4. Click save.
5. Search login.salesforce.com

Build enterprise-quality apps fast and get hands-on with Agentforce and Data Cloud.

Sign up for your Developer Edition.

- ✓ Build apps fast with drag-and-drop tools
- ✓ Go further with Apex code
- ✓ Build AI agents with Agentforce
- ✓ Harmonize your data with Data Cloud
- ✓ Ground Agentforce with structured and unstructured data
- ✓ Integrate with anything using APIs

Sign up for your Developer Edition

A free Salesforce Platform environment with Agentforce and Data Cloud

Milestone 3 – Tabs Activity 1 : Custom tabs creation

1. Go to setup page → type Tabs in Quick Find bar → click on tabs → New (under custom object tab)

Didn't find what you're looking for? Try using Global Search.

Setup Home Object Manager

Q Search Setup

Setup Tabs

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Custom Object Tabs [New](#) [What is This?](#)

No Custom Object Tabs have been defined

2. Select Object(Employer Accounts) → Select the tab style → Next (Add to profiles page) keep it as default → Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save.

The screenshot shows the Salesforce Setup interface with the 'Setup' tab selected. The left sidebar contains a 'Quick Find' search bar and a list of setup categories including 'Setup Home', 'Salesforce Go', 'Service Setup Assistant', 'Commerce Setup Assistant', 'Hyperforce Assistant', 'Release Updates', 'Salesforce Mobile App', 'Lightning Usage', 'Sales Cloud Everywhere', and 'ADMINISTRATION'. The main content area is titled 'New Custom Object Tab' and shows 'Step 1 of 3: Enter the Details'. The instructions state: 'Choose the custom object for this new custom tab. Fill in other details.' The 'New Custom Object Tab' section includes a dropdown for 'Object' set to 'Employer Account', a 'Tab Style' dropdown set to 'Blank', and an optional 'Splash Page Custom Link' set to '--None--'. A red error message indicates 'Required information' is missing. At the bottom, there is a field for 'Enter a short description'.

The screenshot shows the Salesforce Setup interface with the 'Setup' tab selected. The left sidebar shows the 'User Interface' category expanded, with 'Rename Tabs and Labels' and 'Tabs' sub-items. The main content area is titled 'New Custom Object Tab' and shows 'Step 2 of 3: Add to Profiles'. The instructions state: 'Choose the user profiles for which the new custom tab will be available. You may also examine or alter the visibility of tabs from the detail and edit pages of each profile.' There are two radio button options: 'Apply one tab visibility to all profiles' (selected) and 'Apply a different tab visibility for each profile'. Below these options is a table with columns 'Profile' and 'Tab Visibility'.

Profile	Tab Visibility
Analytics Cloud Integration User	Default On
Analytics Cloud Security User	Default On
Anypoint Integration	Default On
Authenticated Website	Default On
Authenticated Website	Default On
B2B Reordering Portal Buyer Profile	Default On
Contract Manager	Default On
Cross Org Data Proxy User	Default On

5. Repeat the same steps for Customer Accounts and Enterprise Accounts.

Milestone 4 - The Lightning App Activity 1 : Create a lightning app

1. Go to setup page → search “app manager” in quick find → select “app manager” → click on New lightning App.

2. Fill the app name in app details and branding as follow

App Name : TheChaiShop&Co

Developer Name : Auto Populates

Add image optional (if you want to give any image you can otherwise not mandatory) - Add Primary color Hex or leave it to default.

Then click Next.

New Lightning App

App Details & Branding

Give your Lightning app a name and description. Upload an image and choose the highlight color for its navigation bar.

Milestone 6 : Fields & Relationships Activity 1 : Create Custom fields for Employer Account

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.
2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.
3. From the object manager page, In the Quick Find box, Search for the custom object you just created : Employer Account

4. From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.

5. Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn't already

exist.

6. Next, choose a data type as Text. Choosing a data type helps you format the field input.

7. Click on next.

Activity 3: Create Custom fields for Enterprise Account

1. Data Type : Text

Field Label: Enterprise Name

Field Name : Auto Populates

Length : 25

Required : Check the box

Click on Next → Next → Save and new.

2. Data Type : Phone

Field Label : Phone Number

Field Name : Auto Populates

Required : Check the box

Click on Next → Next → Save and new.

3. Data Type : Email

Field Label : Email ID

Field Name : Auto Populates

Required : Check the box

Click on Next → Next → Save and new.

4. Date Type : Text

Field Label : Address

Field Name : Auto Populates

Length : 125

Click on Next → Next → Save and new.

5. Date Type : Multi Select Picklist

Field Label : Type of Items

Values : Use Global Picklist value set and select Type of Items from the dropdown menu.

Field Name : Auto Populates.

Required : Check the box

Click on Next → Next → Save and new.

6. Date Type : Multi Select Picklist

Field Label : Products purchased

Values : Use Global Picklist value set and select Items from the dropdown menu.

Field Name : Auto Populates.

Required : Check the box

Click on Next → Next → Save and new.

7. Data Type : Lookup Relationship

Related To : Employer Account

Field Label : Associated Employer Field Name : Auto Populates

Click on Next → Next → Save and new.

8. Data Type : Formula

Field Label : Order Quantity

Field Name : Auto Populates

Formula Return : Number

Enter Formula = Quantity (Number) =

IF(INCLUDES(Products_Purchased__c , "Platinum Tea Powder"), 1, 0) +

IF(INCLUDES(Products_Purchased__c , "Double Delight Tea Powder"), 1, 0) +

IF(INCLUDES(Products_Purchased__c , "Super Dust Tea Powder") , 1, 0) +

 IF(INCLUDES(Products_Purchased__c , "Assorted Pack") , 600, 0)

10.Data Type : Picklist

Field Label : Payment Mode

Values : Use Global Picklist value set and select Payment Mode from the dropdown menu.

Field Name : Auto Populates. Required : Check the box Click on Next
→ Next → Save.

Milestone 7 : Page Layouts

For the personalized field view in Customer Accounts, let's create two page layouts

Online orders and Walk-In orders.

Activity 1: Online Orders page layout

1. Go to the setup page → click on object manager → From drop down click edit for

Customer Account object.

2.Click on the Page Layouts → click New.

3. Page Layout Name : Online Orders and click Save.

The screenshot shows the Salesforce Setup interface. The breadcrumb trail is 'Setup > OBJECT MANAGER'. The main heading is 'Customer Account'. On the left sidebar, 'Page Layouts' is selected. The main content area is titled 'Create New Page Layout'. A yellow informational box states: 'As an option, you may select an existing layout to clone. If you create a page layout without cloning, your page layout will not include the standard sections whose names are translated for your international users.' Below this, the 'Existing Page Layout' dropdown is set to '--None--'. The 'Page Layout Name' text field contains 'Online Orders'. 'Save' and 'Cancel' buttons are at the bottom right.

4. Drag and Arrange all the required fields as shown below.

The screenshot shows the 'Create New Page Layout' page for 'Customer Account'. The 'Page Layout Name' is 'Online Orders'. The 'Fields' section is expanded, showing a list of fields to be added to the layout. The fields are organized into sections: 'Customer Details', 'Order Details', and 'Employee Details'. The 'Customer Details' section includes fields like 'First Name', 'Last Name', 'Email', 'Phone', 'Address', and 'Date of Birth'. The 'Order Details' section includes 'Order ID', 'Order Date', 'Order Amount', and 'Order Status'. The 'Employee Details' section includes 'Employee Name' and 'Employee Email'. The 'Layout Properties' section is also visible, showing options for 'Layout Name', 'Layout ID', 'Layout Type', and 'Layout Version'.

5. Click Save.

Activity 2: Walk-In Orders page layout

1. Go to the setup page → click on object manager → From drop down click edit for Customer Account object.
2. Click on the Page Layouts → click New.
3. Page Layout Name : Walk-In orders and click save.
4. Drag and Arrange all the required fields as shown below.

5. Click Save.

Milestone 8 - Record Types

To Differentiate the records and data stored in Customer Accounts, let's create two different Record Types.

Online orders and Walk-In orders.

Activity 1: Online Orders Record Type

1. Go to the setup page → click on object manager → From drop down click edit for Customer Account object. 2. Click on the Record Types → click New.

3. Enter Details :

Existing Record Type : Master

Record Type Label : Online Order

Record Type Name : Auto Populates

Active : Tick the checkbox

Click Next

The screenshot shows the Salesforce Setup interface. The left sidebar contains a navigation menu with options like Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types (highlighted), Related Lookup Filters, Search Layouts, and List View Button Layout. The main content area is titled 'New Record Type Customer Account' and shows 'Step 1. Enter the details'. It includes a 'Record Type' section with a dropdown for 'Existing Record Type' (set to 'Master'), a text field for 'Record Type Label' (set to 'Online Order'), a text field for 'Record Type Name' (set to 'Online_Order'), and a checked 'Active' checkbox. Below this is a table for assigning the record type to profiles.

Profile Name	Record Types Currently Available	Make Available	Make Default
Analytics Cloud Integration User	Online Order (Default)	☐	☐
Analytics Cloud Security User	Online Order (Default)	☐	☐

4. In Assign Page Layouts

Select Apply one layout to all profiles : select Online orders from the drop down menu.

5. Click Save and New.

Activity 2: Walk-In Orders Record Type

1. Go to the setup page → click on object manager → From drop down click edit for Customer Account object.

2. Click on the Record Types → click New.

3. Enter Details :

Existing Record Type : Master

Record Type Label : Walk-In Order

Record Type Name : Auto Populates

Active : Tick the checkbox

Click Next

4. In Assign Page Layouts

Select Apply one layout to all profiles : select Walk-In orders from the drop down menu.

5. Click Save.

Milestone 9 - Validation Rules

Activity 1: On Employer Account

1. Go to the setup page → click on object manager → From drop down click edit for Employer Account object. 2. Click on the validation rule → click New.

The screenshot shows the Salesforce Setup page with the 'Object Manager' tab selected. Under 'Employer Account', the 'Validation Rules' section is expanded, showing a table of 3 items. The table has columns for Rule Name, Error Location, Error Message, and Active status.

RULE NAME	ERROR LOCATION	ERROR MESSAGE	ACTIVE
Aadhar_Number	Top of Page	Aadhar number is required.	✓
PAN_Number	Top of Page	The Aadhar number must be 12 digits long. Aadhar number can only contain numeric digits. Aadhar number never starts with 0	✓
Phone_Number	Top of Page	The PAN Details field must not be blank. The PAN card number does not start with 0. The PAN card number does not contain special characters.	✓

3. Enter Rule Name : Aadhar Number Error Condition

Formula :

```
AND(  
NOT(ISBLANK( Aadhar_Number__c )),  
LEN( Aadhar_Number__c ) <> 12,  
NOT(REGEX( Aadhar_Number__c , "^[1-9]{12}$"))  
)
```

4. Error Message : Aadhar number is required.

The Aadhar number must be 12 digits long.

Aadhar number can only contain numeric digits.

Aadhar number never starts with 0

5. Click Save & New.

. Repeat the same steps and create two more validation rules on the employer account object.

Enter Rule Name : PAN Number Error Condition
Formula :

```
AND(
  NOT(ISBLANK( Phone_Number__c )),
  NOT(REGEX( Phone_Number__c , "^1-9]{10}$")),
  NOT(REGEX( Phone_Number__c , "^\\d+$"))
)
```

Error Message : The PAN Details field must not be blank.The PAN card number does not start with 0.The

PAN card number does not contain special characters.

Click Save & New.

● Enter Rule Name : Phone Number

Error Condition Formula :

```
AND(  
    NOT(ISBLANK( Phone_Number__c )),  
    NOT(REGEX( Phone_Number__c , "^[1-9]{10}$")),  
    NOT(REGEX( Phone_Number__c , "^\\d+$"))  
)
```

Error Message :The phone number field must not be blank.The phone number must consist of exactly 10 digits.The phone number must contain only numeric digits(no spaces, dashes, parentheses, etc.) Click Save.

Activity 2: On Customer Account

1. Go to the setup page → click on object manager → From drop down click edit for Customer Account object. 2. Click on the validation rule → click New.

3. Enter Rule Name : Phone Number Error Condition

Formula :

```
AND(  
    NOT(ISBLANK( Phone_Number__c )),  
    NOT(REGEX( Phone_Number__c , "^[1-9]{10}$")),  
    NOT(REGEX( Phone_Number__c , "^\\d+$"))  
)
```

Error Message :The phone number field must not be blank.The phone number must consist of exactly 10 digits.The phone number must contain only numeric digits(no spaces, dashes, parentheses, etc.)

4. Click Save.

Milestone 10 - Email Template Activity 1: Email Template

1. Go to setup, In quick find box enter Email template → click on classic Email Template.

2. Click on→ New Email Template

3. Choose the type of email template you would like to create : Text and click Next.

The screenshot displays the Amazon Chime Classic Email Templates interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. A search bar is present. The left sidebar shows 'Classic email templates' and 'Email' categories. The main content area is titled 'Classic Email Templates' and shows 'Unfiled Public Classic Email Templates'. A table lists various templates with columns for Action, Email Template Name, Template Type, Available For Use, Description, Author, and Last Modified Date. Below the table, a 'New Template' wizard is shown, with 'Step 1, Email Template: New Template'. The wizard prompts the user to 'Choose the type of email template you would like to create.' with options: Text (selected), HTML (using Classic Letterhead), Custom (without using Classic Letterhead), and Visualforce. 'Next' and 'Cancel' buttons are visible.

Action	Email Template Name	Template Type	Available For Use	Description	Author	Last Modified Date
Edit Del	Appointment for Unauthenticated User using Appointment Types - For Amazon Chime	Custom	✓	Email template for confirmation of an appointment when appointments are scheduled using appointment types with Amazon Chime.	afidcadmin	3/2/2026
Edit Del	Appointment for Unauthenticated User using Appointment Types - For third party	Custom	✓	Email template for confirmation of an appointment when appointments are scheduled using appointment types with third party video applications.	afidcadmin	3/2/2026
Edit Del	Appointment for Unauthenticated User using Engagement Channels-For Amazon Chime	Custom	✓	Email template for confirmation of an appointment when appointments are scheduled using engagement channels with Amazon Chime.	afidcadmin	3/2/2026
Edit Del	Appointment for Unauthenticated User using Engagement Channels-For third party	Custom	✓	Email template for confirmation of an appointment when appointments are scheduled using engagement channels with third party video applications.	afidcadmin	3/2/2026
Edit Del	Canceled Service Appointment Confirmation Email	Custom	✓	Email Template to confirm canceling of a service appointment.	afidcadmin	3/2/2026
Edit Del	Commerce Reorder Portal: Invitation	Custom	✓	Invite a contact to a Commerce Reorder Portal.	afidcadmin	3/2/2026
Edit Del	Group Service Appointments Enrollment Confirmation Email	Custom	✓	Email Template to confirm enrollment of an attendee to a Group service appointment.	afidcadmin	3/2/2026

Step 1, Email Template: New Template

Choose the type of email template you would like to create.

- ☒ Text
- ☐ HTML (using Classic Letterhead)
- ☐ Custom (without using Classic Letterhead)
- ☐ Visualforce

Next Cancel

The default workflow user is required for scheduled paths in record-triggered flows and time-dependent actions in workflow rules. If the user who triggered the automation is no longer active, the default workflow user is associated with the actions that are executed by the automation. The default workflow user always runs schedule-triggered flows.

Default Workflow User Sohant

By default, no email address is set for the Automated Process User. Event processes and autolaunched flows with triggers use the email address to send emails for actions and errors. Orchestrations use the email address to send notifications. To set the email address for the Automated Process User, specify an organization-wide email address for user selection and default no-reply use for the system administrator profile.

Automated Process User Email Address

By default, the email approval sender is the approval submitter. To override the default sender, select an organization-wide email address.

Email approval sender Approval Submitter

Enabling email approval response lets users reply to email approval requests by typing APPROVE or REJECT in the first line and adding comments in the second line.

Enable email approval response

By enabling the email approval response feature, you agree to allow Salesforce to process email approval responses, update approval requests for all active users in your organization, and update the approval object on behalf of your organization's users.

Let users pause flows when they need to wait for more information. Once you enable this setting, the Pause button appears on every screen that has Pause enabled.

Let users pause flows

Let users resume interviews that are shared with them, either directly or via the role hierarchy. When disabled, interviews can be resumed only by the user who paused the interview or a flow admin who has view access.

Let users resume shared flow interviews

Flows launched from a URL or from Setup use the Lightning runtime experience instead of the classic runtime experience. Only Lightning runtime supports two-column flow screens, custom screen components, and local actions.

Enable Lightning runtime for flows

Milestone 11 - Flows

Let's create a scheduled Triggered flow to automate the Birthday offer mails.

Activity 1: Schedule Triggered Flow

1. Go to setup, Type Flow in quick find box → Click on the Flow and Select the New Flow.

1. Select Schedule - Triggered Flow and click Create.

3. Set a Schedule

Start Date : Enter the Date, when you want to start the flow.

Start Time : Enter the Time, when you want to start the flow.

Frequency : Daily

4. Create Object

Object : Customer Account

Condition Requirements : All conditions Are Met (AND)

Field : Date_of_Birthday_is_today__c

Operator : Equals

Value : \$GlobalConstant.True

Field : Email_ID_c

Operator : IS NULL

Value : \$GlobalConstant.False

5. Click (+) Icon on the flow builder and Select Action Component.

6. In New Action Page

Filter By : Type and select Email Alert

In Action : Search and select Happy Birthday email alert

Label : Send Happy Birthday Email

API Name : Auto Populates

Set Input Values for the Selected Action : Record ID : {!\$Record.Id}

7. Click Done.

8. Click Save on the top right

Flow Label : Happy Birthday Email Flow Flow API Name : Auto Populates Click Save.

The screenshot displays the Salesforce Flow Builder interface. The main canvas shows a flow diagram with three steps: a 'Start' step (green play button icon) labeled 'Thu, Feb 26, 2026, 6:00:00 AM, Daily', followed by a 'Send Happy Birthday Email' step (blue envelope icon) labeled 'Email Alert', and finally an 'End' step (red stop sign icon). The 'Send Happy Birthday Email' step is currently selected, and its configuration panel is open on the right. The configuration panel includes fields for 'Label' (Send Happy Birthday Email), 'API Name' (Send_Happy_Birthday_Email), and a 'Description' field. Below these fields, there is a section titled 'Set Input Values' which contains a dropdown menu showing 'Record ID' and a text input field containing the formula 'Triggering Customer_Account_c > Record ID'. The top of the interface shows the 'Flow Builder' tab and various action buttons like 'Run', 'Debug', 'Save As New Version', 'Save', and 'Activate'.

9. Click Activate.

Milestone 12 - Reports & Dashboards

Activity 1: Customer Account Sales

Report

1. Click App Launcher and select TheChaiShop&Co.
2. Click Reports
3. Click New Report

4. In search type Customer Accounts and Select Customer Accounts.
5. Click Start Report.

6. Click the toggle Update Preview Automatically to ON.
7. Drag and Drop all the required Columns from the Outline pane.
8. Group Rows : Search and Select Customer Account: Record Type
9. Click Add Chart on the top.

The screenshot shows the 'New Customer Accounts Report' interface with a detailed table view. The table has columns for 'Customer Account', 'Customer Account Name', 'Types of Items', 'Products purchased', 'Char', 'Payment Mode', 'Order Quantity', and 'Total Bill'. The data is grouped by 'Online Order (8)' and includes a 'Subtotal' row at the bottom.

Milestone 12 - Conclusion

In conclusion, the development of TheChaiShop&Co CRM application marks a significant stride in enhancing the store's operational efficiency and customer relationship management capabilities. Seamlessly integrating employer details, customer information (both online and offline), and enterprise data, this application streamlines business processes and enables informed decision-making. The automation of sales calculations, including order quantity and total bill amount, reduces errors and empowers employees to focus on delivering

exceptional service. Moreover, automated email notifications for customers' birthdays foster personalized communication and enhance customer engagement.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce Lightning interface to verify correct system behavior. These include:

- Record creation for Employer, Customer, and Enterprise objects
- Validation rule testing for Aadhar, PAN, and phone numbers
- Verification of record types and page layouts
- Formula field validation for order quantity and billing
- Flow execution for birthday email alerts
- Report and dashboard generation

Performance testing ensured fast response time and system stability during concurrent usage.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized data management
- Reduced manual work
- Automated calculations
- Improved customer engagement
- Real-time analytics

Disadvantages

- Requires Salesforce license
- Internet dependency

- Limited offline access

9. Conclusion:

The CRM Application for TheChaiShop&Co successfully improves business operations by integrating customer data, automating billing, and enabling intelligent reporting. The system reduces errors, saves time, and enhances customer relationships through automation and analytics.

10. FUTURE SCOPE

- Mobile CRM integration
- AI-based sales prediction
- WhatsApp/SMS alerts
- Inventory management
- Multi-branch support
- Advanced customer profiling
